ABOUT ME

Full Stack Developer with hands-on experience building responsive web apps using React.js, Node.js and MongoDB. Skilled in creating scalable solutions with modern UI/UX and eager to contribute to high-growth teams.

PROJECTS

SignalOS (*In Progress*)

Building a full-stack platform featuring authentication, user profiles, plan ordering, account management, and order tracking inspired by real-world telecom systems.

Implementing product browsing and end-to-end order placement workflows.

Replicating real-world system architecture with both frontend and backend development, including database integration and API-driven features.

Portfolio Website – www.ruposhigorai.in | 2025

Designed and deployed a fully responsive portfolio using React.js, achieving a 90+ Lighthouse score.

Integrated a dynamic project gallery and interactive contact form to improve engagement.

E-commerce Web App – ecommerce-app-gules-psi.vercel.app | 2025

Built a feature-rich e-commerce app with React and REST API, including advanced product filters and add-to-cart functionality with localStorage persistence.

Implemented responsive pagination and live cart tracking using React Bootstrap and React Router.

Zomato Homepage UI Clone – zomato-homepage-clone-react.vercel.app | 2025

Developed a pixel-perfect clone of Zomato's homepage using React.js & Tailwind CSS.

Integrated live API data fetching, simulating real-time content dynamically.
